

**Murray Dagley**  
**Managing Director - Chemical Technology Pty Ltd**

Murray began working at Beta Chemicals, a major supplier for the Footwear and Automotive industry, in 1979 when it was part of Pacific Dunlop. He gained experience in all aspects of the business until 1989, doing development, sales and management. He founded Chemical Technology with his father John in 1991 and has been managing the business ever since, producing a range of speciality adhesives. Murray will explain the basics of choosing and applying adhesives in relation to the synthetic grass sector.
