The Industry Peak Body For
SPORTS, PLAY & RECREATION CONSTRUCTION IN AUSTRALASIA
Builders & Installers · Manufacturers & Suppliers · Professional Services
www.sapia.org.au

OUR HISTORY

The **SPORTS & PLAY INDUSTRY ASSOCIATION (SAPIA)** is the peak industry body for sports, play and recreation construction in Australasia. Our members are specialists in the areas of design, construction, installation, maintenance, manufacture, supply and testing of sports and play spaces, both domestic and commercial.

SAPIA is a not-for-profit association, established to promote the best construction standards and business practices for the benefit of both members and their customers, as well as to contribute to the safe sporting pleasure of participants who use facilities constructed and/or serviced by members of SAPIA. Our Board of Directors is made up of individuals who are leaders in their fields, who volunteer their services for the benefit of the association and the industry as a whole.

Formed in 2000, we were initially known as the Tennis Court & Sports Field Builders Association of Australasia. We changed our name to the Sports Contractors Association in 2004 as our membership expanded to encompass not only builders but also sports equipment suppliers and professional consultants. In 2016, with the further broadening of our membership to include specialist playground contractors and suppliers, the association rebranded as the Sports & Play Industry Association.

At the time of printing (June 2025) SAPIA has 130 members: builders, sub-contractors, manufacturers, suppliers and professional consultants. Our contractor members have expertise in building and surfacing all types of sports and recreation areas, including tennis and multi-sport courts, basketball and netball courts, pickleball, padel and squash courts, bowling greens, golf courses, hockey fields, athletic tracks, equestrian arenas, soccer and futsal fields, cricket pitches and nets, baseball fields, rugby and AFL fields, fitness areas and playgrounds, skate parks and velodromes. Other members manufacture, supply and install sports flood lighting, fencing, all types of nets, net and goal posts, basketball towers, safety padding, shade structures and shade sails, synthetic grass and acrylic surfacing materials, playground soft fall as well as ancillary products. Consultants provide professional and technical services, including design, engineering, advice and testing to Australian and international standards, as well as international logistics.

SAPIA members must comply with strict membership criteria and abide by the Association's Code of Ethics and Constitution. They are kept up to date with the latest advances in sporting surfaces, construction and installation techniques and equipment technology. SAPIA is represented on Standards Committees in sports and playground surfacing and equipment, lighting and fencing.

The following pages contain profiles and contact details provided by each of our members, current at time of printing. This Directory is updated online throughout the year as new members join, so please visit the SAPIA website www.sapia.org.au for up-to-date membership listings. SAPIA's membership categories include:

- **Principal Contractors**, who have years of experience in the full construction of sports courts, sports fields, play spaces or recreational areas, and demonstrate standards and values acceptable to the Board.
- **Surfacing Contractors** who specialise in surfacing-only services to principal contractor members or other sports and recreation contractors.
- **Associate Contractors** who are suppliers of associated goods and services (e.g. fencing or sports lighting installers, earthworks contractors, concreters and block layers, maintenance personnel) to the sports, play and recreation contracting industry.
- **Professional Services** members include professional consultants: designers, engineers, architects and testing labs etc. who specialise in the sports, play and recreation industry.
- **Manufacturers & Suppliers** of products related to the sports, playground and recreation industry, including but not limited to sports and play equipment, synthetic turf, acrylic surfacing, fencing materials, quarry materials, sports lighting, safety padding etc.
- **Affiliate Members** such as sports governing bodies, reciprocal peak bodies, councils, fund-raisers and honorary members involved with the sports, play and recreation construction industry.

For project advice or quotations, you may choose to communicate directly with the SAPIA members listed on the following pages, or else contact the SAPIA Office by emailing office@sapia.org.au or by phoning **1800 208 202** (Australia) or **0800 208 202** (New Zealand). When more than one quotation is required, we can quickly enquire of our members who have the skills to quote on your project to ascertain who is available.

As the recognised Australasian peak body, the Sports & Play Industry Association fosters excellence, professionalism and continuous improvement throughout the sports, recreation and playground construction industry, in order to provide the high quality facilities necessary for the success and safety of sports and play in our region.

Customers and decision-makers can partner with SAPIA in upholding the highest quality standards by ensuring that the contractors with whom they engage are SAPIA Members. This edition of our Member Directory has been published in June 2025. The publication is updated throughout the year and the most recent edition can be viewed by visiting our website www.sapia.org.au

SAPIA'S AIMS AND OBJECTIVES

- To promote high standards of design, construction and workmanship for sports and play facilities in Australasia.
- To regulate the industry through the vetting and monitoring of SAPIA members.
- To provide and support training and education for the industry's workforce.
- To participate fully in the development of Australian and other Standards for the construction and safe performance of sports, play and recreational facilities, for all levels of ability.
- To publish Codes of Practice relevant to the sports and playground construction industry which may be used as a reference for specifiers and a tool for members.
- To liaise closely with governing bodies for individual sports, as well as play and recreation organisations, both nationally and internationally.
- To encourage the use of new technology and innovation in the design, construction and recycling of sports and play facilities.
- To provide a strong voice for the sports, leisure and playground industry within Australasia.

The SAPIA website is a source of valuable information for anyone involved in the development of sports and play facilities. Visit www.sapia.org.au for Technical Guidance, Exhibitions & Events, Industry Awards winners, our searchable Membership Database and more. Follow our Facebook and LinkedIn pages to view members' projects.

FURTHER INFORMATION

The Sports & Play Industry Association operates through its own full-time administration. For further information, including technical advice, recommended contractors or suppliers for your projects, or to enquire about becoming a SAPIA member, please contact us:

TYRECYCLE

At Tyrecycle, we're committed to eliminating the export of whole-baled tyres. As Australia's largest producer of recycled rubber, our tyres aren't sent offshore or to landfill. That's why we're grabbing the attention of companies both locally and internationally as we continue to develop our environmentally focused innovation to create a cleaner tomorrow, right here in Australia. As part of the highly regarded integrated resource recovery group ResourceCo, we're continually discovering new applications for waste rubber in our quest to decrease the number of tyres entering waste streams and ending up in landfill. We manufacture and supply rubber granules, buffings and powders for use in playground surfaces, sporting surfaces, infill for synthetic and natural turf, equestrian surfaces and more.

HONORARY MEMBERS

J.T. DAVIES

NEW SOUTH WALES

Jack Davies, a Sydney-based consultant structural engineer, has specialised in tennis court and sports field design and construction for over 40 years. Jack was a good tennis player, squash player and cricketer in his own right, and was a consultant to Tennis NSW for many years.

PROFESSOR DAVID EAGER

NEW SOUTH WALES

Professor Eager represents Australia on ISO/TC 83 Sports and Recreational Equipment. He is an invited technical observer on the European Union Technical Committee CEN/TC 136/SC 1 Children's Playground Equipment and Surfacing. David's primary research is in the area of injury prevention by applying risk engineering and technological interventions to eliminate mortalities and reduce the likelihood and severity of injuries. He is also involved in the human factors research within the UTS Research Centre for Intelligent Mechatronic Systems that is conducting research into the physiological and psychological aspects of human-machine and human-environment interaction. David is currently investigating improved techniques and parameters for the measurement of material properties for attenuating surfacing within children's play spaces with a view to reducing the severity and frequency of injuries associated with falls. He is also conducting research into the characterization of trampoline performance.

MAURICE PHILP

QUEENSLAND

Maurice Philp, formerly President of Tennis Queensland from 1998-2004, is a retired Specialist Consulting Civil Engineer who assisted a variety of private, semi-government and government clients on a wide range of projects from small residential estates to multi-story commercial buildings and industrial and mine developments. Throughout his career, Maurice provided advice on matters covering the complete range of geotechnical engineering from investigation and design stages of projects through construction to performance evaluation during project life. Maurice has been acknowledged by Tennis Queensland as the instigator of much change and was credited with being primarily responsible for developing and delivering professional governance within that organisation. He was a member of the Technical Services Advisory Group that published the first edition of Tennis Queensland's Technical Manual for the Design, Construction and Maintenance of Tennis Facilities. It was Maurice's love of tennis that created his solid connection to the game, the tennis fraternity and to our mutual cause which champions good court construction processes.

JOE WADKINS

INTERNATIONAL

US-based Joe Wadkins says: "My mission is to help contractors build their businesses by offering training, education and technical support in the most recognized problems in the synthetic turf industry today." Joe Wadkins aka 'Ask JW' has become one of the leading synthetic turf experts across the globe. Joe has been recognized and awarded by the Nevada Contractors Board for his trade expertise and mission to promote confidence and integrity within the turf industry. He has been highly sought after around the world to consult, design, train and install football, soccer, and baseball fields, not to mention putting greens and pet facilities. His expertise has allowed him to work for many high-end resorts such as Caesars Palace, City Center, Wynn Hotels, Encore, Hotel Beverly Hills, Ritz Carlton Hotel, Palazzo, and so many more to list. JW has been twice awarded for the impeccable synthetic turf installation on the famous Las Vegas Strip Medians. He has been instrumental in engineering, designing, and constructing commercial playgrounds including H.I.C & GMAX Testing. JW is an Inventor with several patents for his "TURFBRUSH" and "SUPERSEAM TOOL", a proprietary process that revolutionized this Industry teaching undetectable seam integration. You may also hear him speak about Superseam Pro 444, the strongest adhesive in the industry. His passion for this Industry is about #helpingothers.

TECHNICAL RESOURCES

SAPIA provides technical information for members, specifiers, customers and end users via our Guide Specifications and Codes of Practice.

As the recognised Australian trade association, SAPIA fosters excellence, professionalism and continuous improvement throughout the sports and play construction industry, in order to provide the high quality facilities necessary for the success and safety of Australian sport and recreation.

SAPIA authored the **Guide Specifications for Tennis Court Construction** more than 20 years ago. The Guide includes information on planning, design, orientation, dimensions, gradients, drainage, surfaces, bases, fencing, lighting and accessories. Since building or resurfacing one or more tennis courts is not only relatively expensive but also a long term investment, special care should be taken in the selection of professionals involved in the project. We recommend using only accredited SAPIA Contractor Members.

In 2018, SAPIA launched the **SAPIA Code of Practice for the Installation and Maintenance of Impact Attenuating Surfacing Systems, Part 1: Wet Pour Rubber Safety Surfacing for Playgrounds**. SAPIA produced this Code of Practice, the first in a series of topics relating to sports and playground construction, to provide prospective clients and specifiers with guidance on the basic construction requirements, specifications and maintenance currently employed in constructing wet pour impact attenuating surfacing in playgrounds. This document calls on the experience of our member companies who have constructed a wide range of installations for a variety of clients over many years. The requirements of the relevant Australian Standards are also incorporated, where appropriate, in the document. It is hoped that it will prove useful in the selection of an appropriate system and surface and form a useful reference in the design and construction process. As noted in the Code, we highly recommend the engagement of an experienced SAPIA contractor member for all aspects of playground design, construction and installation.

In 2022, we published the **SAPIA Code of Practice for the Construction, Surfacing and Maintenance of Sports Courts**, referred to by one of the founding members of the sports court construction industry as 'The Bible'.

In May 2023, SAPIA updated the **SAPIA Code of Practice for the Installation and Maintenance of Impact Attenuating Surfacing Systems**, including other softfall playground surface options, new standards compliance and best installation and maintenance practice recommendations.

We offer these document free of charge to download (see the Technical Guides page of the SAPIA website). Printed copies are also available to purchase at a cost of \$30 each, including postage. Contact the SAPIA office on 1800 208 202 (Australia) or 0800 208 202 (New Zealand) or email office@sapia.org.au for more information or to discuss your particular requirements.

SAPIA members elect their representatives on an annual basis to oversee association business. In September 2024 the following directors were nominated and confirmed to the Board.

Mark Edmondson joined the Board in 2000 and has served as Association President since 2004. Mark is a former elite tennis player, winning six grand slam tournaments, including the Australian Open. Mark got his builders licence and established his sports court construction business in 1992.. In that time, he oversaw the construction of more than 1,500 tennis courts and sports facilities, both domestic and commercial, throughout Sydney and country NSW and the ACT. He sold his business in 2020, and now consults on sports facility projects. In his leisure time, Mark is usually found on the greens at his local Bayview Golf Club.

Ross Jordin was elected to the Board in 2001, and currently serves as Association Treasurer. He has been a part of the sports construction industry for over 40 years, initially as a sub-contractor and later as a tennis court builder. Through his businesses Jordin Sports Constructions, Allsports Constructions and Centre Court Constructions, he has been involved in all elements of sports construction and leisure-time requirements, including earthworks, retaining walls, dynamic and concrete base construction, fencing, lighting, accessories and general landscape installations.

Grant Humphreys was elected to the Board in 2015. As director of sports testing institutes Acousto-Scan and PlayTest, Grant travels within Australasia and around the world testing sporting surfaces to standards set by FIFA, IRB, FIH, AFL/CU and ITF. He is a member of a number of technical and Standards steering committees and has years of experience in the testing and performance of synthetic sport surfaces. In 2024 he was elected Association Vice President.

Jim Tritt was elected to the SAPIA Board in 2016. After graduating with degrees in chemistry and biology from Ohio Wesleyan University, Jim started his career with APT USA in 1995 as a research chemist. Jim has extensive knowledge in the design, manufacture and distribution of synthetic turf systems, including elastic layers, infill materials and adhesives. He is also experienced in the development of polyurethane coatings with a particular emphasis on sports applications including athletic tracks, tennis courts, gymnasium floors and protective coatings for concrete. Within his current role at Sport Group, he is liaising with governing bodies including ITF, FIFA, World Rugby, AFL/CA, IAAF and World Bowls.

Mark Cunningham was elected to the Board in 2016. Mark established his company Synthetic Grass and Rubber Surfaces Australia on Sydney's northern beaches in 1994. His company provides synthetic grass and rubber surfacing to schools, childcare centres, playgrounds and sporting areas. With Mark's extensive knowledge of his products and the industry he has designed a range of synthetic grass that is suitable for any budget and is ideal for the Australian climate. The rubber surfaces are non-toxic, anti-slip and comply with soft fall safety requirements.

Darren Scanlan was elected to the SAPIA Board in 2020. Darren completed his Landscaping Apprenticeship in 1988 and spent his early career as a self-employed contractor, specialising in brick paving and swimming pool construction. After a period in sales for a sporting goods importer he came back to the construction industry, installing synthetic grass into day-care centres and tennis courts. In the early 2000's his laser grading business was contract building and laying synthetic grass tennis courts for various Victorian tennis court companies. Darren commenced as a subcontractor for Grassports Australia (En Tout Cas) in 2005; in 2010 he joined the team as Project Manager and was promoted to General Manager in 2013.

Arun Kosh was elected to the SAPIA Board in 2020. He is the General Manager of the Queensland division of Surfacing Contractors Australia. A background in landscape design and construction led to Arun working in the commercial playground industry before joining SCA in 2013. Arun has worked on projects in the UK, the Middle East and Asia over his 25 years in the industry. This varied and challenging work in the fields of play and recreation means that he has a wealth of knowledge and experience that make him an effective advocate for the industry.

Gregory Stannard was elected to the SAPIA Board in 2024. He is the General Manager of Grand Slam Sports Equipment. With over 30 years' experience in manufacturing across diverse industries and two continents, Greg brings extensive expertise and unwavering commitment to delivering high-quality solutions.

Nathan Weber was elected to the SAPIA Board in 2024. After completing a Bachelor of Built Environment at the University of South Australia, he started working in the family business Surfacing Contractors Australia. Nathan is he is now co-director of Australian Surfacing Supplies. With 10 years hands-on experience in the sports and recreation industry, he is dedicated to a culture of best practice throughout the sector.

Spencer Wallace was elected to the SAPIA Board in 2024. He is the owner and founder of Glooloo Surfacing, which he commenced in 2010. He holds a Bachelor of Arts Hons (Leisure & Recreation Management) and a Cert III in Landscape Construction. With over 25 years industry experience in Australia and the UK, he specialises in wetpour rubber, acrylic sports courts and landscape synthetic grass. His collaboration with architects, engineers and designers has pushed the limits and possibilities of rubber and grass in playscapes.

Brenden Dawson was elected to the SAPIA Board in 2024. Brenden is the Director of Grassports Australia (QLD) and holds expertise in the synthetic sports surfaces industry. He has a strong background in design, project management, installation, and maintenance of sporting facilities. With 25 years of experience include building and managing numerous high-profile installations across Queensland, Brenden ensures top-quality standards and client satisfaction. Brenden values SAPIA as an organisation committed to promoting best practices, industry standards, and professional development and appreciates the association's role in fostering innovation and collaboration within the sports and play industry.
