3RD PLACE SURFACING OF COUNCIL OR SCHOOL PLAY SPACES

An aerial photograph of a modern playground at Malian Park. The playground features a large, winding concrete path that separates different play areas. These areas include a central circular area with a spiral of wooden posts, a rectangular area with a grid of wooden posts, and several smaller areas with wooden climbing structures and slides. The ground is covered with a mix of green grass, brown mulch, and colorful rubber safety surfacing in shades of yellow, orange, and red. The playground is surrounded by a dense forest of tall trees. In the background, a parking lot with several cars and a building are visible.
